COATS OF ARMS IN ST GILES' CHURCH

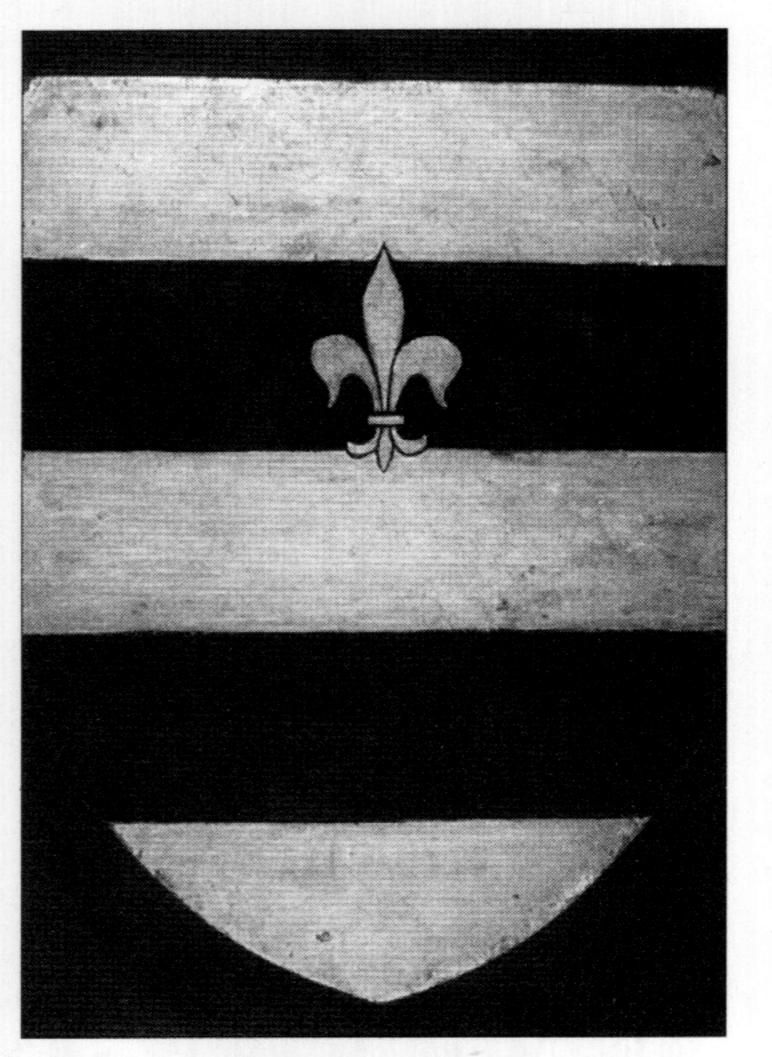

by David Mellor

A FEW MONTHS AGO, I was in St Giles' Church looking for the heraldic shields described in Geoffrey Oldfield's book West Bridgford Past as being on the roof beams. Look as hard as I could, I was unable to find them. I mentioned this to the Rector who managed to find them in a dusty box on top of a cupboard in the tower. There are six of them and they look as if they were made about 50 years ago. Each is made of wood Bridgford. of an identical size and shape and has the design painted on in colour.

The Hilton shield (ar, two bars az, fleur de lis superior ar; ie a silver background with two horizontal blue bars, the upper bearing a silver fleur de lis)

The last of the Luterell family, Hawise Luterell, married Sir Godfrey Hilton in about 1418. Sir Godfrey and his son, also called Godfrey, were the patrons of two rectors of West

Hilton shield

In addition there is a framed picture with drawings of five shields giving their names as Luterell, Hilton, Thimelby, Pierrepont and Musters. These correspond with the wooden shields with the exception that the one for Musters is missing and that there are two extra shields. On the back of one of the extra shields is written in pencil 'Aslockton' and on the other 'Alfreton/Chaworth'.

for the building of the first church towards the end of the 12th

century. The first recorded rector was Luke de Crophill,

whose patron, Sir Andrew Luterell, introduced him to the

living in 1239. Seven generations of Luterells appointed

between them seven West Bridgford rectors.

Lutterell shield

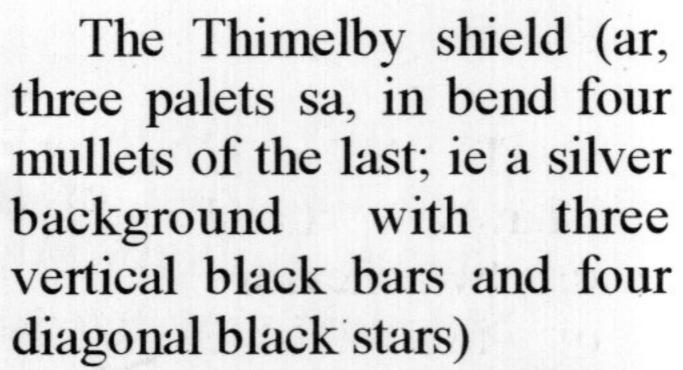

The Luterell shield (or, a bend between six martelets sa; ie a gold background with a diagonal between six martins in black)

This shield seems to have been painted in the reverse colours i.e. gold charges on a black background rather than black charges on a gold background.

The Pierrepont shield (ar, semée of cinquefoils gu, a lion ramp sa; ie a silver background covered all over with red five-petalled flowers with a black lion rearing up) The Luterell family were Lords of the Manor of West Bridgford from 1194 to 1418 and were probably responsible

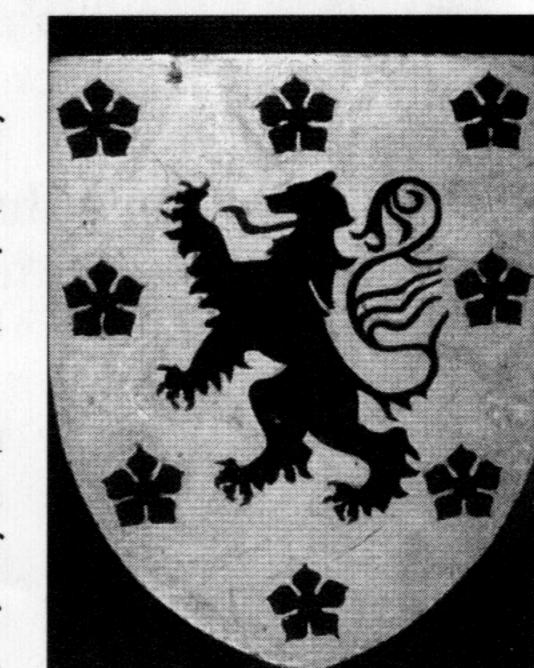

Thimelby shield

Sir Henry Pierrepont, his son Robert, the Earl of Kingston and his grandson Henry, the Marquess of Dorchester, were patrons to four rectors in West Bridgford. In about 1679 the West Bridgford estate came

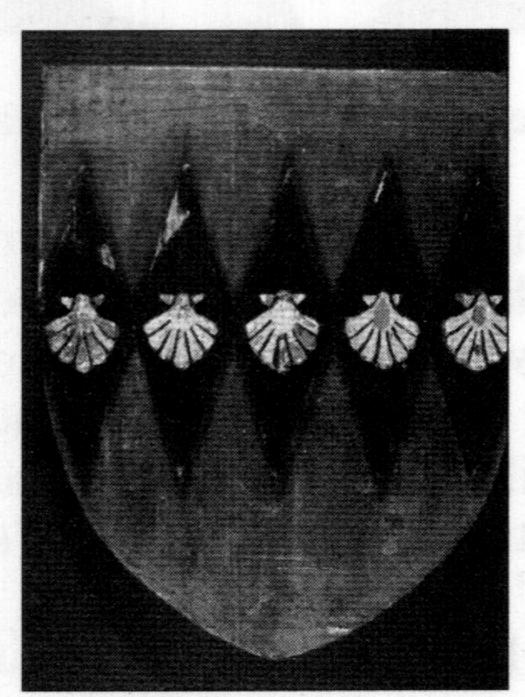

The last of the Hilton family, Elizabeth Hilton, married Richard Sir Thimelby in about 1478. Four generations of Thimelbys were Lords of the Manor of Bridgford West appointed six rectors to St Giles' Church between them. Then John Thimelby sold the West Bridgford Estate to Sir Henry Pierrepont in about

1600.

Pierrepont shield

into the possession of the Musters family, legend having it that the Marquess staked the estate playing cards with Millicent Musters and lost. Thereafter eight generations of Musters appointed eleven rectors to West Bridgford, the last one, William Waters, being introduced by John Chaworth Musters in 1862.

Aslockton shield

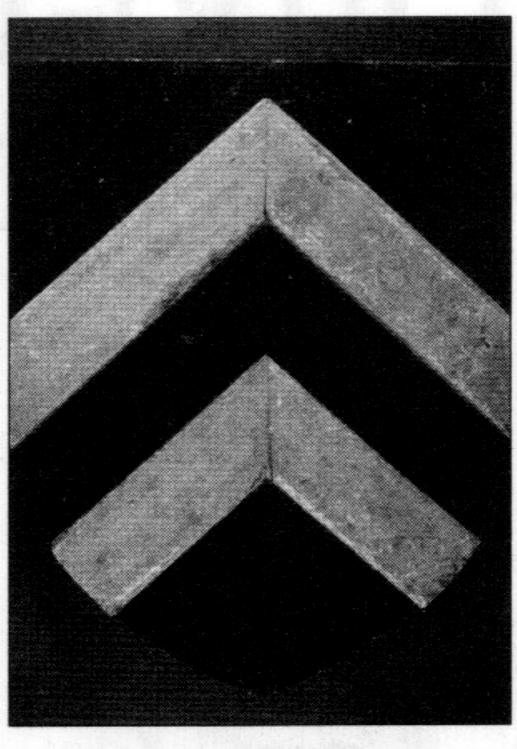

The Aslockton shield (ar, five gu, each fusils charged with an escallop of the field ar; i.e. a silver background with five elongated red diamonds each bearing a silver scallop shell)

the During restoration of St Giles' Church in

1871, a large coat of arms of the Aslockton family was discovered on the wall of the chancel, but was then scraped off. It is probably significant that John de Aslockton was appointed rector of West Bridgford by Sir Andrew Luterell in 1349.

The Alfreton/ Chaworth shield (az, two chevrons or; i.e. a blue background with gold two chevrons)

The shield of the de Alfretons, borne by the Chaworth family, is known to have featured in one of the stained glass windows that was destroyed during

Alfreton/Chaworth shield

the 1871 restoration. The heraldic devices of local families were a common decorative feature in churches during the middle ages and it is unfortunate that these two examples were not preserved by our Victorian predecessors.

I would be very interested to hear from anyone who knows how these heraldic shields came to be made, when they were put up and taken down from the roof beams and the whereabouts of the missing Musters shield.
